ENGINEERING JOURNAL

AMERICAN INSTITUTE OF STEEL CONSTRUCTION

20 YEAR INDEX

1964—1983

Volumes 1—20

SUBJECT INDEX

AISC QUALITY CERTIFICATION PROGRAM

The AISC Quality Certification Program—**Peshek** v15, n3, p102

ANCHOR BOLTS

Design of Headed Anchor Bolts—**Shipp and Haninger** v20,n2, p58

BASE PLATES

Combined Shear and Tension on Grouted Base Details—**Adihardjo and Soltis** v16, n1, p23
Design of Lightly Loaded Steel Column Base Plates—**Murray**..... v20, n4, p143
Graphical Aid for Design of Base Plate Subjected to Moment—**Maitra**..... v15, n2, p50
Errata v15, n4, p144
Preliminary Base Plate Selection—**Stockwell** v12, n3, p92
Rapid Selection of Column Base Plates—**Bird**..... v13, n2, p43
Discussion: **Douty**..... v13, n4, p118
Discussion: **Bird** v14, n1, p47
Steel Column Base Plate Design—**Sandhu** v10, n4, p131
Discussion: **Dixon and Mooseker**..... v11, n2, p48
Discussion: **Gordon** v11, n2, p49
Discussion: **Sandhu** v11, n2, p50

BEARING PLATES

Design of Steel Bearing Plates—**Fling** v7, n2, p37
Discussion: **Fling** v7, n4, p134
Gogate v7, n4, p134

BOX GIRDERS

Box Girder Bridge Design—**Kavanagh** v4, n3, p100
Box Girder Bridge Design—State of the Art—**Heins**..... v15, n4, p126
Prefabricated Press-Formed Steel T-Box Girder Bridge System—**Taly and GangaRao** v16, n3, p75
Steel Box Girder Bridges—**Lally** v10, n4, p117
Steel Box Girder Bridges—Design Guides & Methods—**Heins**..... v20, n4, p121

BRACING

Analysis of Knee-Braced Portal Frames for Vertical Loading—**Vilas and Surtees** v20, n4, p181
The Importance of Tension Chord Bracing—**Fisher**.... v20, n3, p103
Lateral Stiffness of Core/Outrigger Systems—**Boggs and Gasparini**..... v20, n4, p172

BRIDGES

AISC Orthotropic Plate Design Manual—**Milek**..... v1, n2, p40
Analysis of Curved Girder Bridges—**Culver, Brogan and Bednar**..... v7, n1, p10
Analysis of Curved Steel Girder Bridges—**Lavelle**.... v3, n3, p101
Analysis of Horizontally Curved Bridges—**Gillespie**... v5, n4, p137
Another Approach to Simplified Design of a Curved Steel Girder—**Ketchek**..... v6, n4, p116
Approximate Torsional Analysis of Curved Box Girders by the M/R Method—**Tung and Fountain** v7, n3, p65
Box Girder Bridge Design—**Kavanagh** v4, n3, p100
Box Girder Bridge Design—State of the Art—**Heins**..... v15, n4, p126
Bridge Construction Details—**Lally and Milek**..... v6, n1, p3
Discussion: **Vansant**..... v6, n3, p100
The Bridge Delta Girder—Single-Webbed and Double-Webbed—**Hadley**..... v1, n4, p132
Cable Connections in Stayed Girder Bridges—**Podolny** v11, n4, p99
Discussion: **Kavanagh** v12, n2, p70
Cable-Stayed Bridges—**Podolny**..... v11, n1, p1
The Evolution of German Cable-Stayed Bridges—An Overall Survey—**Feige** v4, n3, p113
Fundamentals of Orthotropic Plate Design—**Au and Chang** v1, n2, p34
Horizontally Curved Steel Girders—Fabrication and Design—**Thatcher** v4, n3, p107
Lateral Wind Bracing Requirements for Steel Composite Bridges—**Heins, Hou and Kato**..... v19, n3, p160
Live Load Deflections in a Prestressed Steel Beam Bridge—**Welden**..... v2, n1, p8
Load Factor Design for Steel Highway Bridges—**Hansell and Viest** v8, n4, p113
Modern Approaches to Solution of the Wind Problems of Long Span Bridges—**Scanlan**..... v13, n2, p26
A New Design for Torsion Resistant Suspension Bridges—**Samelson** v13, n4, p103
Discussion: **Birdsall** v14, n3, p114
Discussion: **Samelson** v14, n3, p114
Old Bridges Give Clues to Steel Deck Performance—**Wolchuk**..... v1, n4, p137
The Poplar Street Bridge—**Shields**..... v1, n2, p55
Prefabricated Press-Formed Steel T-Box Girder Bridge System—**Taly and GangaRao**..... v16, n3, p75
Preliminary Design of Curved Bridges—**Heins and Siminou**..... v7, n2, p50
A Prestressed Composite Girder for Short Span Bridges—**Anand** v10, n2, p36
Rapid Selection of W Columns (AASHO Method of Design)—**Mehta**..... v11, n1, p22
Short Span Highway Bridges with Wide Stringer Spacing and a Two-way Reinforced Concrete Deck—**Grossman**..... v2, n2, p52
Steel Box Girder Bridges—**Lally** v10, n4, p117
Steel Box Girder Bridges—Design Guides & Methods—**Heins**..... v20, n4, p121
Straight Element Grid Analysis of Horizontally Curved Beam Systems—**Weissman**..... v7, n2, p41
Testing of a Model Curved Steel Girder Bridge—**Clarke** v3, n3, p106
Vibration and Deflection of Steel Bridges—**Wright and Walker**..... v9, n1, p20
Discussion: **Murray** v9, n4, p168
Wearing Surfaces for Orthotropic Decks—**Gilligan** ... v1, n2, p50

BRITTLE FRACTURE

Fracture and Fatigue Control in Structures—**Rolfe** ... v14, n1, p2

BUCKLING

Buckling of One-Story Frames—**Schilling** v20, n2, p49

CABLE STRUCTURES

Analysis of Cables as Equivalent Two-Force Members—**Tung and Kudder**..... v5, n1, p12
Cable Connections in Stayed Girder Bridges—**Podolny** v11, n4, p99
Discussion: **Kavanagh** v12, n2, p70
Cable-Stayed Bridges—**Podolny**..... v11, n1, p1
Innovative Approaches to the Erection of Tension Roof Structures—**Thornton and Cuoco**..... v11, n4, p86
Steel Cable Creates Novel Structural Space Systems—**Zetlin**..... v1, n1, p1
Discussion: **Gould**..... v1, n2, p68

CASTELLATED BEAMS

Castellated Beams—New Developments—**Boyer** v1, n3, p104
Lateral Instability of Castellated Beams—**Pattanayak and Chesson**. ... v11, n3, p73
Measured and Computed Stresses in Three Castellated Beams—**Douty and Baldwin**. ... v3, n1, p15

COLUMNS

Allowable Axial Stresses in Segmented Columns—**Barnes and Mangelsdorf**. ... v16, n1, p11
AISC Column Design Logic Makes Sense for Composite Columns, Too—**Furlong**. ... v13, n1, p1
Amplification Factors for Beam-Columns—**Koo**. ... v5, n2, p66
Analysis and Design of Framed Columns Under Minor Axis Bending—**Kanchanalai and Lu** ... v16, n2, p29
Discussion: **Nethercot** ... v16, n4, p136
Are Tier Building Column Splices Designed?—**Stetina** v5, n4, p144
Discussion: **Klayton** ... v6, n1, p40
Stetina. ... v6, n1, p40
Bracing of Continuous Columns—**Urdal** ... v6, n3, p80
Calculation of Effective Lengths and Effective Slenderness Ratios of Stepped Columns—**Anderson and Woodward** ... v9, n4, p157
Calculation of Effective Lengths of Stepped Columns—**Agrawal and Stafiej** ... v17, n4, p96
Calculator for Beam-Column Design—**Ting** ... v7, n2, p62
Capacity of Columns with Splice Imperfections—**Popov and Stephen** ... v14, n1, p16
Column Stability in Type 2 Construction—**De Falco and Marino**. ... v3, n2, p67
Column Stability Under Elastic Support—**Higgins**. ... v2, n2, p46
Discussion: **Higgins** ... v2, n3, p106
Zweig ... v2, n3, p105
Combined Shear and Tension on Grouted Base Details—**Adihardjo and Soltis** ... v16, n1, p23
Design of Beam-Columns—**Hooper** ... v4, n2, p41
Design of Columns Subject to Biaxial Bending—**Springfield** ... v12, n3, p73
Direct Design of Columns Subjected to Combined Loading—**Phang and Calenza**. ... v9, n4, p142
Effective Column Length—Tier Buildings—**Higgins** ... v1, n1, p12
Effective Length of Columns in Gable Frames—**Lu** ... v2, n1, p6
The Effective Length of Columns in Unbraced Frames—**Yura**. ... v8, n2, p37
Discussion: **Adams**. ... v9, n1, p40
Gogate ... v8, n3, p110
Johnston. ... v9, n1, p46
Yura. ... v9, n1, p41
... v9, n1, p46
... v9, n4, p167
Zweig ... v9, n1, p47
Effective Length of Columns with Intermediate Axial Load—**Sandhu** ... v9, n4, p154
Effective Length of Columns with Semi-Rigid Connections—**Driscoll** ... v13, n4, p109
The Effective Length of Unbraced Single Story Columns—**Marx** ... v13, n1, p20
Discussion: **Green**. ... v13, n4, p116
Elastic Buckling of a Column Under Varying Axial Force—**Shrivastava**. ... v17, n1, p19
End Restraint and Column Design Using LRFD—**Lui and Chen**. ... v20, n1, p29
Fire Resistance of Protected Steel Columns—**Lie and Stanzak**. ... v10, n3, p82
Discussion: **Lie and Stanzak** ... v10, n4, p135
Stetina. ... v10, n4, p134
Generalized Design of Columns Subjected to Combined Axial Load and Bending—**Monasa and Snyder**. ... v18, n1, p8
Girder Stiffness Distribution for Unbraced Columns—**Stockwell** ... v13, n3, p82
On Inelastic Column Buckling—**Smith** ... v13, n3, p86
Discussion: **Matz** ... v14, n1, p47
Inelastic K-factor for Column Design—**Disque**. ... v10, n2, p33
On the Lateral Support of Inelastic Columns—**Pincus** v1, n4, p113
The New Guide to Stability Design Criteria for Metal Structures—**Johnston** ... v13, n3, p65
One Engineer's Opinion—**Disque** ... v7, n4, p132
One Engineer's Opinion—**Fisher**. ... v17, n1, p14
One Engineer's Opinion—**Stockwell** ... v12, n1, p34
Plastic Design of Biaxially Loaded Beam-Columns—**Ringo, McDonough and Baseheart** ... v10, n1, p6
Rapid Selection of Beam-Columns—**Rubinsky** ... v5, n3, p100
Rapid Selection of Beam-Columns for Wind or Earthquake Effects—**Fiesenheiser and Ronan** ... v13, n4, p97
Rapid Selection of Column Base Plates—**Bird**. ... v13, n2, p43
Discussion: **Douty**. ... v13, n4, p118
Discussion: **Bird** ... v14, n1, p47
Rapid Selection of W Columns (AASHO Method of Design)—**Mehta**. ... v11, n1, p22
Selection of a "Trial" Column Section—**Burgett** ... v10, n2, p56
Simplifications in the Solution of Column Interaction Problems—**Hooper and Rapp** ... v1, n1, p20
Simplified Solution to Interaction Equation—**Phang and Babyak** ... v12, n1, p30
Some Non-Conventional Cases of Column Design—**Dalal** ... v6, n1, p28
A Specification for the Design of Steel-Concrete Composite Columns—**Task Group 20, Structural Stability Research Council**. ... v16, n4, p101
Steel Column Base Plate Design—**Sandhu** ... v10, n4, p131
Steel Column Bending Amplification Factor—**Liu** v2, n2, p50
Discussion: **Scheiner** ... v2, n4, p146
Stiffness Coefficients of Beam-Columns with Non-Prismatic Members—**Stack-Staikidis and Eimer** ... v9, n3, p114
Temperature Effects on Tall Steel Framed Buildings—Part 1, Response of Steel Columns to Temperature Exposure—**McLaughlin** ... v7, n4, p105

COMPOSITE DESIGN

Calculator Program for Determining Properties of Built-up or Composite Members—**Gossett** ... v19, n2, p88
Discussion: **Chesson** ... v19, n4, p214
A Composite Action Duct-Beam System—**Vergun and Shah** ... v5, n3, p85
Composite Action of Concrete Slab and Open Web Joist (Without the Use of Shear Connectors)—**Wang and Kaley** ... v4, n1, p10
Composite Action Without Shear Connectors—**Watson, O'Neil, Barnoff and Mead**. ... v11, n2, p29
Composite Beams of Steel and Lightweight Concrete—**Benjamin**. ... v2, n4, p125
Composite Beams with Formed Steel Deck—**Grant, Slutter and Fisher** ... v14, n1, p24
Composite Design with Lightweight Aggregates on Building Projects—**Leabu** ... v2, n4, p135
Composite Floor System for Sears Tower—**Iyengar and Zils**. ... v10, n3, p74
Composite Open-Web Steel Joists—**Tide and Galambos**. ... v7, n1, p27
Design of Composite Beams with Formed Metal Deck—**Fisher** ... v7, n3, p88
Discussion: **Fisher** ... v8, n1, p33
Winter. ... v8, n1, p32
An Investigation of the Effective Concrete Slab Width for Composite Construction—**Hagood, Guthrie and Hoadley**. ... v5, n1, p20
Lateral Wind Bracing Requirements for Steel Composite Bridges—**Heins, Hou and Kato**. ... v19, n3, p160
Lightweight Concrete-on-Steel Composite Beams—**McGarraugh and Baldwin**. ... v8, n3, p90

Multistory Rigid Frames with Composite Girders Under Gravity and Lateral Forces—**Schaffhausen and Wegmuller** ... v14, n2, p68
One Engineer's Opinion—**Milek** ... v2, n1, p31
One Engineer's Opinion—**Milek** ... v2, n3, p103
Plastic Design of Steel Floor Beams—**Hawes** ... v16, n4, p127
Plastic Design of Unbraced Multistory Steel Frames with Composite Beams—**de Buen** ... v17, n4, p81
A Prestressed Composite Girder for Short Span Bridges—**Anand** ... v10, n2, p36
Pushout Tests on Lightweight Composite Slabs—**Chinn** ... v2, n4, p129
Shear Strength of Stud Connectors in Lightweight and Normal-Weight Concrete—**Ollgaard, Slutter and Fisher** ... v8, n2, p55
Discussion: **Chinn** ... v9, n2, p86
Shear Strength of Thin Flange Composite Specimens—**Goble** ... v5, n2, p62
Some Economic Considerations for Composite Floor Beams—**Lorenz** ... v20, n2, p78
A Specification for the Design of Steel-Concrete Composite Columns—**Task Group 20, Structural Stability Research Council** ... v16, n4, p101
Strength of Three New Types of Composite Beams—**Toprac** ... v2, n1, p21
Structural Lightweight Concrete for Composite Beams—**Jenny** ... v2, n4, p122
Torsional Properties of Composite Girders—**Heins and Kuo** ... v9, n2, p79

COMPUTER SOLUTIONS

Adapting the AISC Specification to Computer-Aided Design—**Goel, Fenves and Gaylord** ... v8, n3, p80
Approximate Analytical Model for Multistory Frames—**LeMessurier, McNamara and Scrivener** ... v11, n4, p92
Automated Analysis of Grid Beam Systems—**Elleby** ... v5, n3, p123
Automated Design of Space Trusses—**Weaver and Patton** ... v5, n1, p26
Automated Optimum Design of Unstiffened Girder Cross Sections—**Goble and Moses** ... v8, n2, p43
Calculator Program for Determining Properties of Built-up or Composite Members—**Gossett** ... v19, n2, p88
Discussion: **Chesson** ... v19, n4, p214
Computer-Aided Design of Stub-Girder System—**Wang and Gotschall** ... v17, n2, p25
Interactive Computer Graphics in Steel Analysis/Design—A Progress Report—**McGuire and Pesquera** ... v20, n3, p89
Minimum Cost Structures by Dynamic Programming—**Moses and Goble** ... v7, n3, p97
Optimum Design of Steel Pipe Racks—**Arya, Feng and Pincus** ... v16, n3, p84
Steel Plate Analysis by Finite Elements—**Firkins** ... v6, n4, p130
Strength Design in Steel Using Programmable Calculators—**Anderson** ... v16, n2, p42

CONNECTIONS

Analysis and Design of a Web Connection in Direct Tension—**Anand and Bertz** ... v18, n2, p48
The Analysis and Design of Single Plate Framing Connections—**Richard, Gillett, Kriegh and Lewis** ... v17, n2, p38
Anchor Bolt Design for Shear and Tension—**Kharod** ... v17, n1, p22
Behavior of Bearing Critical Double-Angle Beam Connections—**Birkemoe and Gilmor** ... v15, n4, p109
Bending Under Seated Connections—**Abolitz and Warner** ... v2, n1, p1
Bolt Tension Control with a Direct Tension Indicator—**Struick, Oyeledun and Fisher** ... v10, n1, p1
Cable Connections in Stayed Girder Bridges—**Podolny** ... v11, n4, p99
Capacity of Columns with Splice Imperfections—**Popov and Stephen** ... v14, n1, p16
A Cautionary Note on Beam Copes—**Milek** ... v17, n3, p72
Commentary on Highly Restrained Welded Connections—**American Institute of Steel Construction** ... v10, n3, p61
Connections Between Steel Frames and Concrete Walls—**Roeder and Hawkins** ... v18, n1, p22
Considerations in the Design of Bolted Joints for Weathering Steel—**Brockenbrough** ... v20, n1, p40
Considerations in the Design of Large-Size Welded Tubular Truss Joints—**Bouwkamp** ... v2, n3, p88
Cost Studies of High Strength Bolted Connections—**Graves** ... v2, n4, p109
Cyclic Yield Reversal in Steel Building Connections—**Popov and Pinkney** ... v8, n3, p65
Design Aids for Single Plate Framing Connections—**Young and Disque** ... v18, n4, p129
Discussion: **Griffiths** ... v19, n3, p179
Design Charts for Bolts with Combined Shear and Tension—**Hagen and Penkul** ... v2, n2, p42
Design of Bolts or Rivets Subject to Combined Shear and Tension—**Zweig** ... v3, n2, p72
Discussion: **Bertwell** ... v3, n4, p165
Zweig ... v3, n4, p166
Design of Single Plate Framing Connections with A307 Bolts—**Richard, Kriegh and Hormby** ... v19, n4, p209
Directional Moment Connections—A Proposed Design Method for Unbraced Steel Frames—**Disque** ... v12, n1, p14
Discussion: **Wiesner** ... v13, n2, p59
Eccentrically Loaded Slip-Resistant Connections—**Kulak** ... v12, n2, p52
Eccentrically Loaded Weld Groups—AISC Design Tables—**Tide** ... v17, n4, p90
Effect of Hole-Making on the Strength of Double Lap Joints—**Iwankiw and Schlafly** ... v19, n3, p170
Effective Length of Columns with Semi-Rigid Connections—**Driscoll** ... v13, n4, p109
End Plate Connections in Plastically Designed Structures—**Onderdonk, Lathrop and Coel** ... v1, n1, p24
Experimental Investigation of Lug Stresses and Failures—**Tolbert and Hackett** ... v11, n2, p34
An Experimental Look at Bracket-Loaded Webs—**Hoptay and Ainso** ... v18, n1, p1
Discussion: **Sears** ... v18, n3, p126
Framing Connections for Square and Rectangular Structural Tubing—**White** ... v2, n3, p94
A Fresh Look at Bolted End-Plate Behavior and Design—**Krishnamurthy** ... v15, n2, p39
Discussion: **Agerskov** ... v16, n2, p54
McGuire ... v16, n2, p55
Griffiths and Wooten ... v16, n2, p56
Rimmer ... v16, n2, p59
Krishnamurthy ... v16, n2, p60
Errata ... v15, n4, p144
A General Solution for Eccentric Loads on Weld Groups—**Brandt** ... v19, n3, p150
Graphical Solution for Selection of Web Splice Bolts—**Powers and Mehta** ... v10, n1, p19
Headed Steel Anchors under Combined Loading—**McMackin, Slutter and Fisher** ... v10, n2, p43
High Strength Bolting—**Munse** ... v4, n1, p18
Discussion: **Kulak** ... v4, n3, p126
Maximum A325 and A490 Bolt Loads at a Glance—**Stetina** ... v7, n3, p75
Maximum A325 Bolt Loads at a Glance—**Stetina** ... v4, n4, p143
Moment Resisting Connections for Mixed Construction—**Hawkins, Mitchell and Roeder** ... v17, n1, p1
Moment-Rotation Characteristics of Shear Connections—**Kennedy** ... v6, n4, p105
One Engineer's Opinion—**Marino** ... v4, n4, p149
One Engineer's Opinion—**Milek** ... v2, n1, p31
Plastic Behavior of Eccentrically-loaded Connections—**Shermer** ... v8, n2, p48
Discussion: **Kulak** ... v8, n4, p144
Shermer ... v8, n4, p145

Plastic Design of Eccentrically Loaded Fasteners—**Abolitz** ... v3, n3, p122
Discussion: **Abolitz** ... v4, n2, p89
Fisher and Kulak ... v4, n2, p88
Plastic Design of Steel Floor Beams—**Hawes** ... v16, n4, p127
Predesigned Bolted Framing Angle Connections—**AISC** ... v19, n1, p1
Quality Control in Design and Supervision Combine to Eliminate Lamellar Tearing—**Thornton** ... v10, n4, p112
Rapid Determination of Ultimate Strength of Eccentrically Loaded Bolt Groups—**Brandt** ... v19, n2, p94
Discussion: **Brandt** ... v20, n1, p46
Iwankiw ... v20, n1, p46
... v20, n2, p88
Marsh ... v19, n4, p214
A Simple Formula for the Polar Second Moment of Area of a Regular Skew-Symmetric Bolt Group—**Irvine and Bradfield** ... v16, n3, p98
Splices in Plastically Designed Continuous Structures—**Hart and Milek** ... v2, n2, p33
Suggestions for Avoiding Beam-to-Column Web Connection Failure—**Driscoll and Beedle** ... v19, n1, p16
Tests of Steel Moment Connections—**Beedle and Christopher** ... v1, n4, p116
Treatment of Eccentrically-loaded Connections in the AISC Manual—**Higgins** ... v8, n2, p52
Wind Connections with Simple Framing—**Disqus** ... v1, n3, p101
Yield Line Analysis of a Web in Direct Tension—**Kapp** ... v11, n2, p38
Yield Line Analysis of Bolted Hanging Connections—**Dranger** ... v14, n3, p92
Discussion: **Dougherty** ... v15, n1, p26
Yield Line Analysis of Column Webs with Welded Beam Connections—**Stockwell** ... v11, n1, p12
Discussion: **Kapp** ... v11, n3, p80
Errata ... v11, n4, p112

CONTAINMENT VESSELS

Conceptual Design of Double Steel Containment Vessels—**Wang** ... v4, n2, p85
Discussion: **Wahl** ... v5, n1, p43
Wang ... v5, n1, p44

CRANE RUNWAYS

Lessons from Crane Runways—**Mueller** ... v2, n1, p16
Discussion: **Klayton** ... v2, n2, p62
Murray ... v2, n3, p107
Saxe ... v2, n2, p62
Mill Building Design Procedure—**Bakota** ... v14, n4, p130
One Engineer's Opinion—**Fisher** ... v17, n1, p14
Tips for Avoiding Crane Runway Problems—**Ricker** ... v19, n4, p181

CURVED GIRDERS

Analysis of Curved Girder Bridges—**Culver, Brogan and Bednar** ... v7, n1, p10
Another Approach to Simplified Design of a Curved Steel Girder—**Ketchek** ... v6, n4, p116
Approximate Torsional Analysis of Curved Box Girders by the M/R Method—**Tung and Fountain** ... v7, n3, p65
Horizontally Curved Steel Girders—Fabrication and Design—**Thatcher** ... v4, n3, p107
Straight-Element Grid Analysis of Horizontally Curved Beam Systems—**Weissman** ... v7, n2, p41

DEFLECTIONS

Analysis of Vierendeel Frames for Deflections—**Abdul-Shafi** ... v16, n1, p18
Live Load Deflections in a Prestressed Steel Beam Bridge—**Welden** ... v2, n1, p8
One Engineer's Opinion—**Milek** ... v2, n1, p31
Vibration and Deflection of Steel Bridges—**Wright and Walker** ... v9, n1, p20

DELTA GIRDERS

The Bridge Delta Girder—Single-Webbed and Double-Webbed—**Hadley** ... v1, n4, p132

DESIGN AIDS

Allowable Loads on Beams Without Lateral Support—**Mataya** ... v4, n1, p28
Discussion: **Grant** ... v4, n3, p126
Allowable Stress for Bending Members—**Maitra** ... v19, n4, p206
Discussion: **Parihk** ... v20, n3, p119
Computing the Effective Plastic Moment—**Carskaddan, Haaijer and Grubb** ... v19, n1, p12
Design Aids for Single Plate Framing Connections—**Young and Disque** ... v18, n4, p129
Discussion: **Griffiths** ... v19, n3, p179
Design Aids—Minimum Depth and Allowable Bending Stress—**Froyton** ... v3, n2, p86
Design Charts for Bolts with Combined Shear and Tension—**Hagen and Penkul** ... v2, n2, p42
Design of Beam-Columns—**Hooper** ... v4, n2, p41
Discussion: **Marrone** ... v3, n4, p167
Design of Single Plate Framing Connections with A307 Bolts—**Richard, Kriegh and Hormby** ... v19, n4, p209
Design of W-Shapes for Combined Bending and Torsion—**Johnston** ... v19, n2, p65
Discussion: **Lin** ... v20, n2, p82
Salmon ... v19, n4, p215
Errata ... v19, n3, p169
Direct Feasible and Optimal Design of Laterally Unsupported Beams—**Brandt** ... v14, n2, p78
Economics of Low-Rise Steel-Framed Structures—**Ruddy** ... v20, n3, p107
Fast Design of Beams with C_b Greater Than 1.0—**Burgett and Tide** ... v17, n3, p74
Graphical Aid for Design of Base Plate Subjected to Moment—**Maitra** ... v15, n2, p50
Errata ... v15, n4, p144
A Graphical Method for Cantilevered and Suspended Span Beams—**Mehta** ... v18, n2, p54
Maximum A325 and A490 Bolt Loads at a Glance—**Stetina** ... v7, n3, p75
Maximum A325 Bolt Loads at a Glance—**Stetina** ... v4, n4, p143
Nomograph for Design of Channel Section Beams—**Maitra** ... v12, n2, p68
Nomograph for Design of Power Plant and Industrial Precipitator Shell—**Maitra** ... v18, n2, p58
Plastic Design Aids for Pinned-Base Gabled Frames—**Manolis and Beskos** ... v16, n1, p1
Predesigned Bolted Framing Angle Connections—**AISC** ... v19, n1, p1
Preliminary Analysis and Member Sizing of Tall Tubular Steel Buildings—**Wong, El Nimeiri and Tang** ... v18, n2, p33
Preliminary Base Plate Selection—**Stockwell** ... v12, n3, p92
Rapid Determination of Ultimate Strength of Eccentrically Loaded Bolt Groups—**Brandt** ... v19, n2, p94
Discussion: **Brandt** ... v20, n1, p46
Iwankiw ... v20, n1, p46
... v20, n2, p88
Marsh ... v19, n4, p214
Rapid Selection of Beam-Columns for Wind or Earthquake Effects—**Fiesenheiser and Ronan** ... v13, n4, p103
Rapid Selection of Column Base Plates—**Bird** ... v13, n2, p43
Discussion: **Douty** ... v13, n4, p118
Rapid Selection of W Columns (AASHO Method of Design)—**Mehta** ... v11, n1, p22
Simplified Approach to AISC Bending Formulas—**Stockwell** ... v11, n3, p65
Simplified Design for Torsional Loading of Rolled Steel Members—**Lin** ... v14, n3, p98
Errata ... v19, n2, p87

Simplified Procedure to Determine Maximum Beam Deflection—**Koo** ... v4, n3, p123
Simplified Solution to Interaction Equation—**Phang and Babyak** ... v12, n1, p30
Steel Members Subject to Axial Tension and Biaxial Bending Moments—**Hsu** ... v19, n2, p86
Stress Reduction Factor for Unsupported Lengths—**Roy** v18, n2, p60
Yield Line Analysis of Column Webs with Welded Beam Connections—**Stockwell** ... v11, n1, p12

DRIFT

Drift Reduction Factors for Belted High-Rise Structures—**McNabb and Muvdi** ... v12, n3, p88
Discussion: **Muvdi and McNabb** ... v14, n1, p44
Errata ... v12, n4, p152
Seismic Drift Control Criteria—**Teal** ... v12, n2, p56
Errata ... v12, n3, p100

DOMES

Buckling of Framed Domes—**Buchert** ... v2, n4, p120
Experimental Study of a Schwedler Rigid Framed Dome—**Beavers and Beaufait** ... v9, n2, p73
The Steel Framed Dome—**Stevens and Odom** ... v1, n3, p83
Stiffened Thin Shell Domes—**Buchert** ... v1, n3, p78

DUCT-BEAM SYSTEM

A Composite Action Duct-Beam System—**Vergun and Shah** ... v5, n3, p85

EARTHQUAKE DESIGN

Design of an Eccentrically Braced Steel Frame—**Popov and Roeder** ... v15, n3, p77
Eccentrically Braced Frame Construction—A Case History—**Libby** ... v18, n4, p149
Discussion: **Popov** ... v20, n3, p120
Rapid Selection of Beam-Columns for Wind or Earthquake Effects—**Fiesenheiser and Ronan** ... v13, n4, p103
Seismic Design Practice for Steel Framed Buildings—**Teal** ... v12, n4, p101
Discussion: **SEAOC Seismology Committee** ... v13, n2, p57
Discussion: **Teal** ... v13, n2, p58
Errata ... v13, n2, p64
Seismic Drift Control and Building Periods—**Teal** ... v15, n2, p30
Discussion: **Berg** ... v15, n3, p91
Seismic Drift Control Criteria—**Teal** ... v12, n2, p56
Errata ... v12, n3, p100
Seismic Steel Framing Systems for Tall Buildings—**Popov** ... v19, n3, p141
Shear in Beam-Column Joints in Seismic Design of Steel Frames—**Krawinkler** ... v15, n3, p82
Simplified Seismic Drift Analysis of High-Rise Steel Frames—**Fleischer** ... v11, n3, p53
Steel is Changing the Los Angeles Skyline—**Johnston** v1, n4, p109
An Update on Eccentric Seismic Bracing—**Popov** ... v17, n3, p70

END PLATES

A Fresh Look at Bolted End-Plate Behavior and Design—**Krishnamurthy** ... v15, n2, p39
Discussion: **Agerskov** ... v16, n2, p54
Griffiths and Wooten ... v16, n2, p56
Krishnamurthy ... v16, n2, p60
McGuire ... v16, n2, p55
Rimmer ... v16, n2, p59
Errata ... v15, n4, p144

ERECTION

Innovative Approaches to the Erection of Tension Roof Structures—**Thornton and Cuoco** ... v11, n4, p86

FABRICATION

Assurance of Reliability in Fabricated Steel Structures Tnrough Nondestructive Testing—**Olsson** ... v6, n2, p49
Correlation of Discontinuities and Physical Properties in Steel Weldments—**Criscuolo** ... v6, n2, p41
Detailing to Achieve Practical Welded Fabrication—**Blodgett** ... v17, n4, p106
Horizontally Curved Steel Girders—Fabrication and Design—**Thatcher** ... v4, n3, p107
Investigation of Triangular Heats Applied to Mild Steel Plates—**Nicholls and Weerth** ... v9, n4, p137
Reliability Assurance in Navy's Welded Steel Shore Structures—**Amirikian** ... v6, n2, p46
Reliability in Building Construction Through Nondestructive Testing—**Greenberg** ... v6, n2, p60
Use of Ultrasonic Testing in the Structural Steel Industry—**Wehrmeister** ... v6, n2, p55

FATIGUE

Cyclic Yield Reversal in Steel Building Connections—**Popov and Pinkney** ... v8, n3, p65
Fatigue Strength of Steel Members with Welded Details—**Fisher** ... v14, n4, p118
Fracture and Fatigue Control in Steel Structures—**Rolfe** v14, n1, p2
In-Plane Fatigue Strength of Plates with Laminar Discontinuities—**Brockenbrough and Owens** ... v13, n3, p68

FINITE ELEMENT ANALYSIS

Steel Plate Analysis by Finite Elements—**Firkins** ... v6, n4, p130

FIRE-RESISTANT CONSTRUCTION

Exposed Steel Framing on High Rise Buildings—**Nassetta** ... v6, n3, p74
Fire Resistance of Protected Steel Columns—**Lie and Stanzak** ... v10, n3, p82
Discussion: **Lie and Stanzak** ... v10, n4, p135
Stetina ... v10, n4, p134
Fire Resistance of Structural Steel—**Lie** ... v15, n4, p116
Fire Safety of External Building Elements—The Design Approach—**Law** ... v15, n2, p59
Errata ... v15, n3, p108
Noncombustible Schools for Omaha—**Alsmeyer** ... v8, n1, p15
A Rational Approach to Fire Engineering Design of Steel Buildings—**Thor, Pettersson and Magnusson** ... v14, n3, p108
The Severity of Fires in Steel-Frame Buildings—**Seigel** v4, n4, p139
Structural Steel and Fire—More Realistic Analysis—**Lie and Stanzak** ... v13, n2, p35

FOLDED PLATE ROOFS

Folded Steel Plate for a Suburban Branch Bank—**Shogren** ... v1, n1, p28
Steel Shell Roof Structures—**Nilson** ... v3, n1, p2

GABLE FRAMES

Admissible Loads of Gable Frames with Independent Forces—**Cheng** ... v5, n4, p155
Effective Length of Columns in Gable Frames—**Lu** ... v2, n1, p6
Plastic Design Aids for Pinned-Base Gabled Frames—**Manolis and Beskos** ... v16, n1, p1

GIRDERS

Analysis of Curved Girder Bridges—**Culver, Brogan and Bednar** ... v7, n1, p10
Analysis of Helicoidal Girders—**Abdul-Baki and Bartel** v6, n3, p84
Another Approach to Simplified Design of a Curved Steel Girder—**Ketchek** ... v6, n4, p116
Approximate Torsional Analysis of Curved Box Girders by the M/R Method—**Tung and Fountain** ... v7, n3, p65
Automated Optimum Design of Unstiffened Girder Cross Sections—**Goble and Moses** ... v8, n2, p43
The Bridge Delta Girder—Single-Webbed and Double-Webbed—**Hadley** ... v1, n4, p132
The Case for the Semi-Box Girder—**Schlenker** ... v9, n1, p32
Design of Unstiffened Girders—**Abolitz** ... v6, n1, p21

Girder Stiffness Distribution for Unbraced Columns—**Stockwell** ... v13, n3, p82
Homogeneous and Hybrid Girder Design in the AISC Specification—**Milek** ... v7, n1, p2
Prefabricated Press-Formed Steel T-Box Girder Bridge System—**Taly and GangaRao** ... v16, n3, p75
A Simplified Method for the Flexural Design of Stiffened Hybrid Girders—**Chong** ... v13, n1, p18
A Stub-Girder System for High-Rise Buildings—**Colaco** v9, n3, p89
Torsional Properties of Composite Girders—**Heins and Kuo** ... v9, n2, p79
Web Design Under Compressive Edge Loads—**Elgaaly** v20, n4, p153

GRID BEAM SYSTEMS

Automated Analysis of Grid Beam Systems—**Elleby** ... v5, n3, p123
Yield-Line Analysis and Design of Grids—**Cannon** ... v6, n4, p124

HUMAN RESPONSE TO BUILDING MOTION

Human Response to Wind-Induced Motion of Buildings—**Hansen, Reed and Vanmarcke** ... v16, n3, p66

HYPERBOLIC PARABOLOIDS

Buckling of Hyperbolic Paraboloids—**Buchert** ... v9, n2, p70
Discussion: **Koc** ... v9, n4, p169
Curvilinear Grid Frames—**Hutton** ... v1, n3, p69
Steel Shell Roof Structures—**Nilson** ... v3, n1, p2

INDUSTRIAL BUILDINGS

Structural Details in Industrial Buildings—**Fisher** ... v18, n2, p83
Discussion: **Marx and Fisher** ... v19, n2, p139

INSPECTION

Assurance of Reliability in Fabricated Steel Structures Through Nondestructive Testing—**Olsson** ... v6, n2, p49
Correlation of Discontinuities and Physical Properties in Steel Weldments—**Criscuolo** ... v6, n2, p41
Reliability Assurance in Navy's Welded Steel Shore Structures—**Amirikian** ... v6, n2, p46
Reliability in Building Construction Through Nondestructive Testing—**Greenberg** ... v6, n2, p60
Use of Ultrasonic Testing in the Structural Steel Industry—**Wehrmeister** ... v6, n2, p55

LAMELLAR TEARING

Commentary on Highly Restrained Welded Connections—**American Institute of Steel Construction** ... v10, n3, p61
Discussion: **Jones** ... v12, n1, p36
Discussion: **Milek** ... v12, n1, p36
Quality Control in Design and Supervision Combine to Eliminate Lamellar Tearing—**Thornton** ... v10, n4, p112

LATERAL BUCKLING

Direct Feasible and Optimal Design of Laterally Unsupported Beams—**Brandt** ... v14, n2, p78
One Engineer's Opinion—**Milek** ... v2, n3, p103
One Engineer's Opinion—**Milek** ... v3, n2, p88
One Engineer's Opinion—**Milek** ... v7, n2, p64
On the Lateral Support of Inelastic Columns—**Pincus** v1, n4, p113
Simplified Approach to AISC Bending Formulas—**Stockwell** ... v11, n3, p65
Stress Reduction Factor for Unsupported Lengths—**Roy** v18, n2, p60
A Unified Approach to the Elastic Lateral Buckling of Beams—**Nethercot and Rockey** ... v9, n3, p96
Discussion: **Piepenburg and Chinn** ... v10, n2, p60

LOAD FACTOR DESIGN

End Restraint and Column Design Using LRFD—**Lui and Chen** ... v20, n1, p29
An Introduction to Load and Resistance Factor Design for Steel Buildings—**Pinkham and Hansell** ... v15, n1, p2
Load and Resistance Factor Design—**Galambos** ... v18, n3, p74
LRFD Design Office Study—**Wiesner** ... v15, n1, p18
Load Factor Design for Steel Highway Bridges—**Hansell and Viest** ... v8, n4, p113
Load Factor Design of Steel Buildings—**Galambos** ... v9, n3, p108
Proposed Criteria for Load and Resistance Factor Design—**Galambos and Ravindra** ... v15, n1, p8
Errata ... v15, n2, p76

MANUAL OF STEEL CONSTRUCTION, 8TH EDITION

Eccentrically Loaded Weld Groups—AISC Design Tables—**Tide** ... v17, n4, p90
8th Edition Manual Errata ... v17, n3, p79
... v17, n4, p120
... v18, n2, p71
... v19, n1, p62

MASONRY WALLS

Steel Supported Masonry Walls—**Soltis and Tuan** ... v17, n1, p11

MILL BUILDINGS

Mill Building Design Procedure—**Bakota** ... v14, n4, p130
Discussion: **Gogate** ... v15, n2, p75
Discussion: **Diefenderfer** ... v15, n4, p143

MODEL TESTING

Small Scale Models for Steel Frameworks—**Litle** ... v3, n3, p113
Testing of a Model Curved Steel Girder Bridge—**Clarke** v3, n3, p106

MULTISTORY BUILDINGS

Analysis and Design of Framed Columns Under Minor Axis Bending—**Kanchanalai and Lu** ... v16, n2, p29
Discussion: **Nethercot** ... v16, n4, p136
Analysis of Vierendeel Frames for Deflections—**Abdul-Shafi** ... v16, n1, p18
Approximate Analytical Model for Multistory Frames—**LeMessurier, McNamara and Scrivener** ... v11, n4, p92
Applied Plastic Design of Unbraced Multistory Frames—**Disque** ... v8, n4, p124
Discussion: **Wiesner** ... v9, n3, p134
Are Tier Building Column Splices Designed?—**Stetina** v5, n4, p144
Discussion: **Klayton** ... v6, n1, p40
Stetina ... v6, n1, p40
Calculation of Wind Drift in Staggered-Truss Buildings—**Leffler** ... v20, n1, p1
A Composite Action Duct-Beam System—**Vergun and Shah** ... v5, n3, p85
Composite Floor System for Sears Tower—**Iyengar and Zils** ... v10, n3, p74
Computer-Aided Design of Stub-Girder System—**Wang and Gotschall** ... v17, n2, p25
Design of an Eccentrically Braced Steel Frame—**Popov and Roeder** ... v15, n3, p77
Design of Braced Multi-Story Frames by the Plastic Method—**Lu** ... v4, n1, p1
Directional Moment Connections—A Proposed Design Method for Unbraced Steel Frames—**Disque** ... v12, n1, p14
Discussion: **Wiesner** ... v13, n2, p59
Drift Reduction Factors for Belted High-Rise Structures—**McNabb and Muvdi** ... v12, n3, p88
Discussion: **Muvdi and McNabb** ... v14, n1, p44
Errata ... v12, n4, p152
The Dry Floor—A New Approach to High Rise Apartment Buildings—**Newman** ... v3, n4, p161
Dynamic Analysis of Multistory Buildings—**Sandhu** ... v11, n3, p67
Eccentrically Braced Frame Construction—A Case History—**Libby** ... v18, n4, p149
Discussion: **Popov** ... v20, n3, p120
Economic Study of a Braced Multistory Steel Frame—**Williams and Galambos** ... v5, n1, p2
Effective Column Length—Tier Buildings—**Higgins** ... v1, n1, p12
Efficiency of Tubular Framing for Medium-Height Buildings—**Leffler** ... v16, n4, p116

Exposed Steel Framing on High Rise Buildings—**Nassetta** ... v6, n3, p74
Girder Stiffness Distribution for Unbraced Columns—**Stockwell** ... v13, n3, p82
Human Response to Wind-Induced Motion of Buildings—**Hansen, Reed and Vanmarcke** ... v16, n3, p66
Lateral Stiffness of Core/Outrigger Systems—**Boggs and Gasparini** ... v20, n4, p172
Lateral Support for Tier Building Frames—**Galambos** ... v1, n1, p16
Discussion: **Hooper** ... v1, n4, p141
Lehigh Conference on Plastic Design of Multi-Story Frames—A Summary—**Driscoll** ... v3, n2, p57
Light Gage Steel Infill Panels in Multistory Steel Frames—**Miller** ... v11, n2, p42
A Method for the Plastic Design of Unbraced Multistory Frames—**de Buen** ... v15, n3, p92
A Modification to the Subassemblage Method of Designing Unbraced Multi-story Frames—**de Buen** ... v6, n4, p138
Multistory Rigid Frames with Composite Girders Under Gravity and Lateral Forces—**Schaffhausen and Wegmuller** ... v14, n2, p68
One Engineer's Opinion—**Disque** ... v7, n4, p132
Optimum Belt Truss Locations for High-Rise Structures—**Taranath** ... v11, n1, p18
Errata ... v11, n2, p52
Panel Zone Effect on the Strength and Stiffness of Steel Rigid Frames—**Becker** ... v12, n1, p19
Partial Tube Concept for Mid-Rise Structures—**Colaco** v11, n4, p81
Plastic Design of a 14-Story Apartment Building—**Bennett** ... v4, n2, p68
Plastic Design of a Three-Story Steel Frame—**de Buen** v2, n3, p71

Plastic Design of Multi-Story Buildings—A Progress Report—**Yura and Driscoll** ... v2, n3, p76
Plastic Design of Unbraced Multistory Steel Frames with Composite Beams—**de Buen** ... v17, n4, p81
A Plastic Method for Unbraced Designs—**Daniels** ... v3, n4, p141
Preliminary Analysis and Member Sizing of Tall Tubular Steel Buildings—**Wong, El Nimeiri and Tang** ... v18, n2, p33
Preliminary Wind Analysis of Multistory Bents—**Ben-Arroyo** ... v7, n1, p16
Push-up Steel Construction—**Hansen** ... v6, n3, p65
Recent Developments in Steel Building Design—**Beedle, Lu and Ozer** ... v10, n4, p98
Research in Plastic Design of Multi-Story Frames—**Driscoll and Beedle** ... v1, n3, p92
Seismic Design Practice for Steel Buildings—**Teal** ... v12, n4, p101
Discussion: **SEAOC Seismology Committee** ... v13, n2, p57
Discussion: **Teal** ... v13, n2, p58
Errata ... v13, n2, p64
Simplified High-Rise Drift Analysis and Optimized Adjustment—**Fleischer** ... v9, n2, p50
Simplified Seismic Drift Analysis of High-Rise Steel Frames—**Fleischer** ... v11, n3, p53
Some Aspects of Stub-Girder Design—**Bjorhovde and Zimmerman** ... v17, n3, p54
The Staggered Truss System—Structural Considerations—**Scalzi** ... v8, n4, p138
Steel is Changing the Los Angeles Skyline—**Johnston** v1, n4, p109
Steel Shear Walls for Existing Buildings—**Baldelli** ... v20, n2, p70
Stiffness Design of Unbraced Steel Frames—**Cheong-Siat-Moy** ... v13, n1, p8
Structural System—Standard Oil of Indiana Building—**Picardi** ... v12, n2, p42
A Stub-Girder System for High-Rise Buildings—**Colaco** ... v9, n3, p89
Temperature Effects on Tall Steel Framed Buildings
Part 1—Response of Steel Columns to Temperature Exposure—**McLaughlin** ... v7, n4, p105
Part 2—Structural Analysis—**West and Kar** ... v7, n4, p110
Part 3—Design Considerations—**Khan and Nassetta** v7, n4, p121
Test on Diaphragm Behavior of Dry-Floor System with Steel-Edged Gypsum Planks—**Fang** ... v5, n1, p37
An Update on Eccentric Seismic Bracing—**Popov** ... v17, n3, p70
Wind Connections with Simple Framing—**Disque** ... v1, n3, p101

ONE-STORY BUILDINGS

Analysis of Knee-Braced Portal Frames for Vertical Loading—**Vilas and Surtees** ... v20, n4, p181
Economics of Low-Rise Steel-Framed Structures—**Ruddy** ... v20, n3, p107

ORTHOTROPIC PLATE DECK BRIDGES

AISC Orthotropic Plate Design Manual—**Milek** ... v1, n2, p40
Fundamentals of Orthotropic Plate Design—**Au and Chang** ... v1, n2, p34
Old Bridges Give Clues to Steel Deck Performance—**Wolchuk** ... v1, n4, p137
Wearing Surfaces for Orthotropic Decks—**Gilligan** ... v1, n2, p50

PAINTING

Painting Structural Steel—**Keane** ... v8, n1, p6

PIPE RACKS

Optimum Design of Steel Pipe Racks—**Arya, Feng and Pincus** ... v16, n3, p84

PLASTIC DESIGN

Applied Plastic Design of Unbraced Multistory Frames—**Disque** ... v8, n4, p124
Discussion: **Wiesner** ... v9, n3, p134
Deformation Analysis of Structures Near Collapse Load—**Lavingia** ... v5, n3, p128
Design Curves for Plastic Design of Uniformly Loaded Steel Beams—**Hill and Vanderplaats** ... v5, n4, p148
Design of Braced Multi-Story Frames by the Plastic Method—**Lu** ... v4, n1, p1
Economic Study of a Braced Multistory Steel Frame—**Williams and Galambos** ... v5, n1, p2
End Plate Connections in Plastically Designed Structures—**Onderdonk, Lathrop and Coel** ... v1, n1, p24
Generalized Superposition Method in Plastic Analysis—**Pincus** ... v4, n4, p13
High Strength Steels for Plastic Design—**Adams** ... v3, n4, p150
Lehigh Conference on Plastic Design of Multi-Story Frames—A Summary—**Driscoll** ... v3, n2, p57
A Method for the Plastic Design of Unbraced Multistory Frames—**de Buen** ... v15, n3, p92
A Method of Combining Mechanisms in Plastic Analysis—**Pincus** ... v2, n3, p85
A Modification to the Subassemblage Method of Designing Unbraced Multistory Frames—**de Buen** ... v6, n4, p138
Plastic Design Aids for Pinned-Base Gabled Frames—**Manolis and Beskos** ... v16, n1, p1
Plastic Design Applied to Trusses—**Croucher and Fisher** ... v10, n1, p29
Plastic Design by Moment Balancing—**Gaylord** ... v4, n4, p129
Discussion: **Gaylord** ... v5, n2, p81
Gurfinkel ... v5, n2, p79
Plastic Design of a 14-Story Apartment Building—**Bennett** ... v4, n2, p68
Plastic Design of a Three-Story Steel Frame—**de Buen** v2, n3, p71
Plastic Design of Biaxially Loaded Beam-Columns—**Ringo, McDonough and Baseheart** ... v10, n1, p6
Plastic Design of Eccentrically Loaded Fasteners—**Abolitz** ... v3, n3, p122
Discussion: **Abolitz** ... v4, n2, p89
Fisher and Kulak ... v4, n2, p88
Plastic Design of Multi-Story Buildings—A Progress Report—**Yura and Driscoll** ... v2, n3, p76
Plastic Design of Steel Floor Beams—**Hawes** ... v16, n4, p127
Plastic Design of Unbraced Multistory Steel Frames with Composite Beams—**de Buen** ... v17, n4, p81

A Plastic Method for Unbraced Frame Design—**Daniels** ... v3, n4, p141
Research in Plastic Design of Multi-Story Framing—**Driscoll and Beedle** ... v1, n3, p92
Splices in Plastically Designed Continuous Structures—**Hart and Milek** ... v2, n2, p33
Stiffness Design of Unbraced Steel Frames—**Cheong-Siat-Moy** ... v13, n1, p8
Tables for Plastic Design of Beams with Rectangular Holes—**Redwood** ... v9, n1, p2

PONDING

Failure of Simply-Supported Flat Roofs by Ponding of Rain—**Chinn** ... v2, n2, p38
Discussion: **Walsh** ... v2, n3, p107
Fast Check for Ponding—**Burgett** ... v10, n1, p26
Ponding of Two-Way Roof Systems—**Marino** ... v3, n3, p93
Discussion: **Marino** ... v4, n1, p36
Sawyer ... v4, n1, p34

PRESTRESSED STEEL

Live Load Deflections in a Prestressed Steel Beam Bridge—**Welden** ... v2, n1, p8
A Prestressed Composite Girder for Short Span Bridges—**Anand** ... v10, n2, p36
A Prestressed Steel Frame—**Rogers** ... v4, n2, p62
Discussion: **Rogers** ... v4, n4, p151
Shah ... v4, n4, p151
Thermal Prestressing of Structural Steel—**Wichman** ... v2, n4, p115
Discussion: **Barnoff** ... v3, n2, p91
Which Design Concept for Prestressed Steels?—**Tochacek and Amrhein** ... v8, n1, p18

PUSH-UP CONSTRUCTION

Push-up Steel Construction—**Hansen** ... v6, n3, p65

SHEAR SPLICES

One Engineer's Opinion—**Marino** ... v4, n4, p149

SHELL STRUCTURES

Nomograph for Design of Power Plant and Industrial Precipitator Shell—**Maitra** ... v18, n2, p58
Shell Shapes Framed in Steel—**Geiger** ... v2, n3, p65
Steel Shell Roof Structures—**Nilson** ... v3, n1, p2
Stiffened Thin Shell Domes—**Buchert** ... v1, n3, p78

SPACE FRAMES

Analysis of Framed Space Structures—**Baer** ... v3, n1, p10
Automated Design of Space Trusses—**Weaver and Patton** ... v5, n1, p26
A Cost Evaluation of Space Trusses of Large Span—**Geiger** ... v5, n2, p49
Hyperboloid Space Frames for Tower Structures—**Levinton** ... v4, n3, p93
A Prestressed Steel Space Frame—**Rogers** ... v4, n2, p62
Quality Control in Design and Supervision Combine to Eliminate Lamellar Tearing—**Thornton** ... v10, n4, p112
Space Frame Buckling—**Buchert** ... v5, n4, p152
Space Frame Structures—**Naslund** ... v1, n4, p126
Stresses and Displacements in Three-Dimensional Trusses—**Kushman and Geer** ... v3, n2, p80
Yield-Line Analysis and Design of Grids—**Cannon** ... v6, n4, p124

SPECIFICATIONS

History of Steel Beam Design—**Galambos** ... v14, n4, p141
The Mysterious ⅓ Stress Increase—**Ellifritt** ... v14, n4, p138

STABILITY

The New Guide to Stability Design Criteria for Metal Structures—**Johnston** ... v13, n3, p65
A Practical Method of Second Order Analysis—**LeMessurier**
Part 1—Pin Jointed Systems ... v13, n4, p89
Part 2—Rigid Frames ... v14, n2, p49
Stability of Metal Structures—A World View—**SSRC, ECCS, CRCJ, CMEA**
Part 1 ... v18, n3, p90
Part 2 ... v18, n4, p154
Part 3 ... v19, n1, p27
Part 4 ... v19, n2, p101
Discussion, Part 1: **Clark** ... v19, n2, p140
Discussion, Part 2: **Wolchuk** ... v19, n2, p140

STAGGERED TRUSS SYSTEM

Calculation of Wind Drift in Staggered-Truss Buildings—**Leffler** ... v20, n1, p1
The Staggered Truss System—Structural Considerations—**Scalzi** ... v8, n4, p138

STEEL FOR STRUCTURES

The Behavior of A514 Steel Tension Members—**Kulak** v8, n1, p1
Discussion: **Macadam** ... v8, n3, p111
Classification of Steels for Structures—**Task Group 5, Column Research Council** ... v8, n3, p99
In-Plane Fatigue Strength of Plates with Laminar Discontinuities—**Brockenbrough and Owens** ... v13, n3, p68

STEEL SHEAR WALLS

Steel Shear Walls for Existing Buildings—**Baldelli** ... v20, n2, p70

STUB GIRDERS

Computer-Aided Design of Stub-Girder System—**Wang and Gotschall** ... v17, n2, p25
Some Aspects of Stub-Girder Design—**Bjorhovde and Zimmerman** ... v17, n3, p54

TAPERED MEMBERS

Application of AISC Design Provisions for Tapered Members—**Lee and Morrell** ... v12, n1, p1
Tension-Field Design of Tapered Webs—**Falby and Lee** v13, n1, p11
Errata ... v13, n2, p64

TORSION

Design of W-Shapes for Combined Bending and Torsion—**Johnston** ... v19, n2, p65
Discussion: **Lin** ... v20, n2, p82
Salmon ... v19, n4, p215
Errata ... v19, n3, p169
Simplified Design for Torsional Loading of Rolled Steel Members—**Lin** ... v14, n3, p98
Discussion: **Lin** ... v15, n2, p76
Discussion: **Maitra** ... v15, n1, p26
Errata ... v19, n2, p87
Torsion in Closed Sections—**Siev** ... v3, n1, p46
Torsion of Rolled Steel Sections in Building Structures—**Hotchkiss** ... v3, n1, p19
Discussion: **Burton** ... v3, n2, p91
Hotchkiss ... v3, n2, p91
